Boxes "X" on Cat Nos. 6357P & 6827P Only.

Strong metal boxes with good screening properties afforded by the thick walls (average thickness $\frac{3}{32}$ ") aided by close fitting flanged lid.

Since any one method of fixing the box to other equipment is unlikely to be suitable for all requirements, attachment is left to individual requirement.

Section on C

Four sizes are available with dimensions given below, they are cast in aluminium alloy LM-2 B.S. 1490 and are consequently light in weight and easy to machine.

The boxes are supplied in natural metal as any one finish is unlikely to suit all users.

When ordering please identify requirement by use of the catalogue numbers only.
